DETAILED ACTION

Response to Amendment

Applicant's arguments filed 8/27/03 have been fully considered but they are not persuasive.

I. Rejection of claims 1-32 under 35 USC 103(a) will be maintained for reasons on record and reasons as follows.

Applicant argues that Crudden provides a general disclosure of sacrosinate compatibility with a general list of surfactants including quaternary ammonium compounds and lauryl dimethylamine oxide but does not describe or suggest ratios. Examiner maintains that it would have been obvious to one having ordinary skill in the art to determine optimum ratios. One would have been motivated to do this in order to develop the most effective composition. Examiner maintains that when the prior art discloses / suggests all components of the composition without a description of ratios, Applicant must show the criticality of the claimed ratio range.

Applicant argues that Margin describes glyphosate compositions containing C8-22 dimethyl amine oxide surfactants and quaternary ammonium halide surfactants having 8-40 carbon atoms. Applicant argues that this surfactant combination is preferred and additional surfactants are avoided. Applicant further argues that Margin does not teach or suggest sacrosinate surfactants. Examiner argues that Margin does not teach that no other surfactant can be used in his invention besides those in his specification. However, Margin does teach that the components described in his

Art Unit: 1616

specification are the preferred components to ensure success. Examiner believes that any inventor would say the same about his or her invention.

Applicant argues there exist no motivation to combine Crudden and Margin to arrive at instant invention comprising sacrosinate. Examiner argues that both Margin and Crudden individually teach herbicide compositions which is ample motivation for combining Crudden and Margin. This combination would have been expected to deliver a single herbicide composition possessing a broader spectrum of activity.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
